

## Our supply chain of man-made cellulose fibres (March 2022)

In line with Inditex's Forest Product Policy<sup>1</sup> and our commitment to the *CanopyStyle* initiative led by *Canopy Planet* NGO, and to the *Roadmap towards responsible viscose & modal fibre manufacturing* driven by *Changing Markets Foundation*, Inditex's suppliers work<sup>2</sup> exclusively with the best manufacturers of cellulose fibres (viscose, modal, lyocell), i.e., those ranked as "green shirts" in *CanopyStyle*<sup>3</sup> *Hot Button Report*, who are committed to the *Changing Markets Foundation*<sup>4</sup> Roadmap:

- **Lenzing Group**
- **Birla Cellulosic Division**
- **Tangshan Sanyou**

On the other hand, with regard to Join Life orders, viscose or modal shall be traced and outsourced from specific factories that are EU-BAT compliant and listed in the Join Life standard. For further information on Join Life cellulose fibres requirements, visit: <https://www.wateractionplan.com/join-life>
